## Work Experience

### FreeAgent CRM

Campbell, CA

Software Engineer

Nov 2022 - Present

- Developed inventory management system to generate information regarding product expiration dates using API system
- Wrote documentation for integrating email API, reducing onboarding for learning tooling by a week
- Outlined relational database schema for event manager using SQL
- Refactored legacy codebase by simplifying platform integration with client database, improving performance by 50%
- Developed and staff report tool with custom UI using React, JavaScript, and CSS, allowing clients to generate customized reports, increasing productivity by 200%

### Illiac Software

Champaign, IL

Software Engineer

April 2022 - Nov 2022

- Developed dynamic and responsive notification system using React that updated and fetched data from the backend
- Created database migration and API routes for online discussion feature using PHP, Laravel, and Symfony
- Improved Redux frameworks by refactoring API calls to database, reducing load time by 50%
- Wrote unit tests using Cypress to ensure app stability and functionality

### Fremont Unified School District

Fremont, CA

Music Director

Aug 2021 - Jun 2022

- Developed the ability of over 300 students in musicality and technique through ensemble rehearsal
- Automated the creation of daily lesson plans using Python, reducing time required for planning by 90%
- Used python-pptx Python library to scrape JSON file with class information to generate PowerPoint presentations

### Illiac Software

Champaign, IL

Quality Assurance Engineer

Oct 2019 - May 2021

- Tested features by running edge cases in a procedural fashion, allowing identification and reporting of issues
- Documented issues and errors on Jira, ensuring issues could be reproduced and fixed
- Collaborated with platform engineering team to benchmark app performance based on CPU architecture

## Projects

### Pandabot

<https://github.com/garonfok/pandabot>

TypeScript, Node.js, MongoDB, DiscordJS, WOKCommands

- Created CRUD app to track Minecraft worlds and coordinates using MongoDB and Discord API
- Designed features that let users distinguish different waypoints and worlds on the same server
- Deployed on selfhosted Raspberry Pi to multiple Discord servers

### Personal Website

<https://garonfok.com>

TypeScript, Node.js, React, TailwindCSS, Netlify

- Created portfolio website using React and TailwindCSS
- Integrated CI/CD by utilizing Netlify hosting off a GitHub repository, ensuring rapid bugfixing and updates

## Technical Skills

**Programming Languages** HTML, CSS, SASS, JavaScript, TypeScript, Python, MySQL, PostgreSQL, GraphQL

**Frameworks/Libraries** React, NodeJS, MongoDB, Redux, Axios, ElectronJS, TailwindCSS

**Tools/Platforms** Docker, AWS EC2, Git, Redis, Gitlab, GitHub, Bitbucket, Jira, Cypress

## Education

**University of Illinois at Urbana-Champaign**

Champaign, IL

B.M.E. Music Education

May 2021
